Ernakulam , Kerala |

PROFESSIONAL SUMMARY

Detail-oriented B.Com Computer Application graduate (2021) and MEARN stack developer fresher with hands-on experience in building responsive web applications through academic and personal projects. Strong foundation in MongoDB, Express.js, Angular, React, and Node.js, along with a good understanding of UI/UX principles to create user-friendly interfaces. Passionate about learning new technologies, and contributing to collaborative development environments.

PROJECTS

Real-Time Team Collaboration Platform (MERN , Socket.io)

- Built Slack-style real-time chat using Socket.io
- Implemented role-based access (Admin / Moderator / Member)
- Designed Kanban board with drag and drop and optimistic updates
- Integrated file uploads and activity tracking

Personal Routine Management Application

- Developed a routine and task management web application using React.js
- Implemented CRUD operations for task and schedule management
- Built reusable React components and managed application state

EDUCATION

Bachelor of Commerce (B.Com) – Computer Application

2018 – 2021

Mahatma Gandhi University, Kerala

- Developed logical reasoning and problem-solving skills aligned with web and application development
- Studied core concepts in Computer Applications, Programming Fundamentals, Database Management, and Web Technologies
- Gained working knowledge of SQL, including basic queries, data retrieval, and database concepts

Higher Secondary Education (Commerce with Computer Application)

2016 – 2018

- Studied programming fundamentals using C and C++
- Built foundational understanding of computer applications and logical problem-solving

CERTIFICATION

MEARN Stack Development Certification

2025 – 2026

Luminar Technolab, Kochi

- Completed professional full-stack development training covering MongoDB, Express.js, React.js, Node.js, Next.js, Angular, and modern JavaScript (ES6+)
- Developed and deployed multiple real-world full-stack applications using MERN, MEAN, and Next.js architectures
- Designed and implemented scalable RESTful APIs with JWT authentication, role-based access control, and structured middleware architecture
- Modeled and optimized MongoDB database schemas, improving query efficiency and application performance
- Built responsive, component-based user interfaces following UI/UX best practices and performance optimization techniques

- Applied state management, reusable component design, and API integration to deliver dynamic frontend experiences Practiced deployment workflows, environment configuration, and debugging production builds
- Strengthened debugging, problem-solving, version control, and end-to-end application delivery skills

SKILLS

Programming Languages: JavaScript, C , C++ , JAVA

Libraries and Frameworks: React, Express.js , Node.js, Next.js, Angular

Databases: MongoDB, SQL

UI/UX and Design Tools: Figma, Canva

CMS and Other Tools: WordPress, GitHub

Languages: English, Hindi, Malayalam
